SUMMARY

A results-driven final-year Computer Science student at the University of Namibia, with demonstrated expertise in full-stack development and four months of hands-on internship experience. Proven track record of delivering web applications and contributing to production-level software projects. Technical proficiency spans modern frameworks including Flutter, React, and Node.js, complemented by strong problem-solving abilities and collaborative teamwork skills. Passionate about crafting innovative software solutions and eager to contribute practical development experience to a dynamic engineering team.
